

# OGM: davvero contro natura?

## Introduzione

PATRIZIA BORSELLINO

### *Introduction*

*Abstract:* The introduction to the *Forum* “GMOs: Really Against Nature?” highlights that the controversial and ideological approach to the GMOs issue in Italy largely depends on the interpretation of scientific evidences in this field. In order to countervail this trend, the papers collected in the *Forum* take a broader view as to the role of international, European, and national law in facing biotechnological development.

*Keywords:* GMOs, Sustainable development law, Precaution principle, Artifice.
