

OGM, biosicurezza e diritto internazionale in materia di sviluppo sostenibile: una breve riflessione biogiuridica

SILVIA SALARDI

GMOs, Biosafety, and International Sustainable Development Law from a Biolaw's Perspective

Abstract: The topic of GMOs provides a fruitful terrain for discussing questions concerning legal regulation of new scientific advances in biotechnology. The paper focuses on GMO from the point of view of the international legal regulation concerning biosafety and concludes that the Cartagena Protocol still provides a good example of legal regulation of complex multidisciplinary bioethical problems.

Keywords: GMOs, Bioethics, Biolaw, Sustainable development, International sustainable development law.
