Commenti al volume di Lorena Forni *I contrari della pace*

La chiarezza del linguaggio come strumento di pace

PATRIZIA BORSELLINO

Clarity of Language as a Tool for Peace

Abstract: The paper highlights the innovativeness and fertility of the approach to the themes of war and peace from an analytical-linguistic perspective, adopted by Lorena Forni in her book *I contrari della pace*. In particular, emphasis is placed on the ample exemplification of uses of language in a propagandistic and manipulative function, taken from the analysis of real contexts (terrorism, Russian/Ukrainian conflict, and Sars pandemic CoV.2) and literary contexts, as well as to the importance attributed in the book to the construction of a language purified from propaganda in order to achieve the objective of peace.

Keywords: Peace, War, Analysis of language, Persuasive definition, Propaganda.
