

Perché la pace?

ALBERTO SCERBO

Peace, Why?

Abstract: War is considered by modern political doctrines to be the natural condition of man and law is an instrument of control and justification of war. Lorena Forni's book allows us to reveal the manipulative practices of propaganda and the limits of some form of pacifism. But above all it helps to rediscover the natural humanity of law, which makes it the authentic antithesis of war.

Keywords: Power, Natural peace, Humanity of law.
