

Neuroetica: fondamenti e nuove frontiere

Commenti al volume, a cura di Andrea Lavazza e Vittorio A. Sironi, *Neuroetica*

La neuroetica, il libero arbitrio e la responsabilità

SERGIO FILIPPO MAGNI

Neuroethics, Free-will, and Responsibility

Abstract: This article highlights some aspects of the handbook on Neuroethics edited by Lavazza e Sironi. The author focuses on the constitution of Neuroethics as a separate philosophical discipline, and on the consequences of the neuroethical revolution on human free-will and moral responsibility. In this way, the author challenges some traditional beliefs contained in some chapters of the book.

Keywords: Neuroethics, Free-will, Responsibility, Determinism, Anthropology.
