Introduction

Abstract: The Forum explores the transformations that the new legal framework of health data sharing – enshrined in the Regulation EU 2025/327 (European Health Data Space) – has produced. Throughout a multidisciplinary approach combining legal, ethical and philosophical perspectives, it focuses on the potential and pitfalls of the distinction between primary and secondary use of health data as regards the conceptualization of health in its multiple dimensions.

Keywords: Health data, Secondary use, Right to health.
