Religion, Political Inclusivism and Legitimization by Constitution

Abstract: This article critically examines Valentina Gentile's book *Libertà con le religioni*. After reconstructing Gentile's rendition of the current debate on whether religious conceptions deserve a special treatment concerning rights and obligations, the article discusses Gentile's innovative concepts of "political inclusivism" and "culture of civility", meant as an enrichment of Rawls's paradigm of political liberalism. In the end, a question is raised concerning the neglected significance of the liberal principle of legitimacy within this debate on religion and liberal politics.
